Foreword	v
3.6 Test	1
3.6.1 Scope	1
3.6.2 Type of performance test	1
3.6.3 NPIPR (net positive inlet pressure required)	1
3.6.4 Terminology	2
3.6.5 Performance test	6
3.6.6 Hydrostatic test (optional)	13
3.6.7 Net positive inlet pressure required test (optional)	15
3.6.8 Rate of flow measurement	15
3.6.9 Measurement of pressure	16
3.6.10 Power measurements	18
3.6.11 Methods for rotary speed measurement	19
3.6.12 Temperature measurement	20
3.6.13 Suitable interval between calibrations for performance test instruments	20
Appendix A Index	22
Figures	
Figure 3.45 — Recommended test setup	8
Figure 3.46 — Speed correction values for pump input power for $x = 1.5$	12
Figure 3.47 — Pump performance at constant speed	12
Figure 3.48 — Pump performance at constant pressure	12
Figure 3.49 — Information data sheet	14
Figure 3.50 — Pressure tap opening with corrosion-related plug	17
Figure 3.51 — Welded-on pressure tap opening	17
Figure 3.52 — Loop manifold connecting pressure taps	18
Figure 3.53 — Use of calibrated bourbon gauge	18
Tables	
Table 3.7 — Symbols	3
Table 3.8 — Subscripts	4
Table 3.9 — Test tabulation	10
Table 3.10 — Recommended instrument calibration interval	21
