Foreword	v
8 Direct acting (steam) pumps	
8.0 Scope	1
8.1 Types and nomenclature	1
8.1.1 Introduction	1
8.1.2 Types	1
8.1.3 Nomenclature	3
8.1.4 Drive (steam) end	3
8.2 Definitions	7
8.2.1 Stroke (L)	7
8.2.2 Pressures (p)	7
8.2.3 Suction conditions	10
8.2.4 Pump efficiency (η_p)	10
8.3 Design and application	12
8.3.1 Purpose	12
8.3.2 Typical services	12
8.3.3 Pump speeds	12
8.3.4 Acceleration head (h_{acc}) — acceleration pressure (p_{acc})	12
8.4 Installation, operation and maintenance	14
8.4.1 Safety	14
8.4.2 Storage	14
8.4.3 Location of pump	14
8.4.4 Protection of pump against seepage or flood	14
8.4.5 Provision for servicing space	14
8.4.6 Hydraulic action — direct acting (steam) piston pump	15
8.4.7 Gaskets, pipe dope and pipe tape	15
8.4.8 Drive (steam) end lubrication	15
8.4.9 Plunger or piston rod packing installation	15
8.4.10 Cup type pistons	20
8.4.11 Inspection	22
8.4.12 Main drive (steam) valve setting	22
8.4.13 Drive (steam) end lubrication	23
8.4.14 Drains	23
8.4.15 Malfunctions, cause and remedy	23
8.5 Reference and source material	26

Appendix A Index	27
------------------------	----

Figures

8.1 — Types of direct acting (steam) pumps	1
8.2 — Direct acting, horizontal, double piston, (steam) pump. Drive (steam) end is on left and liquid end is on right.	1
8.3 — Horizontal simplex direct acting (steam) pump	2
8.4 — Horizontal duplex direct acting (steam) pump	2
8.5 — Double-acting plunger type liquid end	3
8.6 — Valve plate type liquid end	3
8.7 — Side valve pot type liquid end (end view, duplex pump)	4
8.8 — Drive (steam) end – horizontal duplex pump	5
8.9 — D slide valve	6
8.10 — Piston valve	6
8.11 — Inside-fixed lost-motion valve gear	6
8.12 — Inside-adjustable lost-motion valve gear	6
8.13 — Outside-adjustable lost-motion valve	6
8.14 — Piston packing joints	18
8.15 — Hydraulic packing	18
8.16 — Metallic liquid piston ring pack	19
8.17 — Cup type packing	21
8.18 — Assembling cup piston	21
8.19 — Correct and incorrect piston rod nut tightening	22

Tables

8.1 — Symbols	8
8.2 — Subscripts	9
8.3 — Barometric pressure versus elevation	10
8.4 — Maximum temperature for ring materials	19
8.5 — Maximum concentration of chemicals for phenolic type rings	19
8.6 — Malfunctions – cause and remedy	24
