

# Table of Contents

Introduction .....	xv
Knowledge Areas .....	1

## Chapter • One **Pump Types, 1**

1.1 Rotodynamic .....	1
1.2 Positive Displacement .....	2

## Chapter • Two **Pump System Components, 5**

2.1 Prime Movers .....	5
2.2 Piping .....	5
2.3 Valves .....	5
2.4 End-use Equipment .....	6
2.5 Pump System Overview .....	6

## Chapter • Three **Pump System Component Interactions, 7**

3.1 Piping .....	7
3.2 Prime movers .....	7
3.3 Valves .....	8
3.4 End-use Equipment .....	9
3.5 System Curves .....	9

## Chapter • Four **Standard Pump System Operating Procedures, 11**

Chapter • Five  
**Benefits of Pump System Optimization, 15**

5.1	Efficiency .....	15
5.2	Life Cycle Costs .....	16
5.3	Other .....	16

Chapter • Six  
**Factors that Impact Pump Efficiency and Reliability, 17**

6.1	Design Review and Operation .....	17
6.2	Rotodynamic Pump Operating Regions .....	35
6.3	Rotodynamic Pump Net Positive Suction Head .....	36
6.4	Allowable Nozzle Loads .....	37
6.5	Pump Suction Piping and Intake Design .....	37
6.6	Material of Construction .....	38
6.7	Pump Antifriction Bearings .....	39
6.8	Pump Sleeve Bearings .....	39
6.9	Bearing Housings, Seals, and Lubricants .....	41
6.10	Mechanical Seals .....	41
6.11	Improper Installation and/or Maintenance .....	42

Chapter • Seven  
**Factors that Affect Pump System Reliability  
and Efficiency, 43**

7.1	Improper Mechanical Seal System Design .....	43
7.2	Drivers .....	44
7.3	Motor Temperature .....	44
7.4	Motor Cooling .....	44
7.5	Gearboxes and Gearing .....	45
7.6	Pump Piping .....	45

---

Chapter • Eight  
**Elements of Life Cycle Costing, 47**

8.1 Introduction. . . . .	47
8.2 Initial Cost ( $C_{ic}$ ) . . . . .	48
8.3 Installation and Commissioning (Start-up) Cost ( $C_{in}$ ). . . . .	48
8.4 Energy Cost ( $C_e$ ). . . . .	49
8.5 Operating Cost ( $C_o$ ). . . . .	50
8.6 Maintenance and Repair Cost ( $C_m$ ). . . . .	50
8.7 Downtime and Loss of Production Cost ( $C_s$ ) . . . . .	52
8.8 Environmental Cost, Including Disposal of Parts and Contamination from Pumped Liquid ( $C_{env}$ ) . . . . .	52
8.9 Decommissioning and Disposal Cost, Including Restoration of the Local Environment ( $C_d$ ) . . . . .	53

Chapter • Nine  
**Basic Pump Maintenance Practices, 55**

9.1 Introduction. . . . .	55
9.2 Preventive Actions . . . . .	55
9.3 Predictive Actions . . . . .	55
9.4 Periodic Efficiency Testing. . . . .	56

Chapter • Ten  
**Piping and Instrumentation Diagrams, 59**

Chapter • Eleven  
**Isometrics, 61**

Chapter • Twelve  
**Process Flow Diagrams, 63**

Chapter • Thirteen  
**Engineering Drawings, 65**

13.1 Introduction .....	65
13.2 Anatomy of a Drawing .....	65

Chapter • Fourteen  
**Key Plant Personnel (Positions) Needed on an  
Assessment Team, 69**

14.1 Personality Traits .....	70
14.2 Standard Roles and Expectations .....	71

Chapter • Fifteen  
**Roles and Responsibilities of an Assessment Team, 73**

Chapter • Sixteen  
**Field Measurement Parameters and their  
Acceptable Ranges, 75**

16.1 Field Measurements of Fluid and Electrical Parameters .....	75
16.2 Acceptable Performance Range .....	76

Chapter • Seventeen  
**Hydraulic and Electrical Formulae, 77**

17.1 Net Positive Suction Head Available (NPSHA) .....	77
17.2 Affinity Rules .....	78
17.3 Motor Load and Efficiency .....	80

Chapter • Eighteen  
**Measuring Devices and their Requirements and Proper  
Applications, 83**

18.1 Pressure .....	83
18.2 Flow .....	84
18.3 Input Power .....	84

Chapter • Nineteen  
**Common Operating Problems and Errors, 85**

19.1 Improper Equipment Operation . . . . .	85
---	----

Chapter • Twenty  
**Pump and Motor Performance Curves, 87**

20.1 Pump Selection Chart . . . . .	87
20.2 Pump Manufacturer's Published Curve . . . . .	88
20.3 Certified Performance Curve . . . . .	89
20.4 Motor Performance Curve . . . . .	90

Chapter • Twenty-One  
**System Curves, 93**

21.1 Operating Duty Point . . . . .	93
-------------------------------------	----

Chapter • Twenty-Two  
**Parameter Estimation Methods, 97**

Chapter • Twenty-Three  
**Data Collection and its Relationship to Reliability, 99**

Chapter • Twenty-Four  
**Reliability Metrics, 101**

24.1 Reliability . . . . .	101
24.2 Availability . . . . .	101
24.3 Average Cost per Repair . . . . .	102
24.4 Annual Repair Cost per Installed Horsepower . . . . .	102
24.5 Installed Cost per Horsepower per Machinery Type . . . . .	102
24.6 Material Multiplier . . . . .	102

Chapter • Twenty-Five  
**Currently Available Equipment and Technology, 103**

Chapter • Twenty-Six  
**Industry Best Practices, 105**

Chapter • Twenty-Seven  
**Basic Financial Analysis, 107**

27.1 Look Beyond Energy Savings ..... 107  
27.2 Attach Dollar Values to Nonenergy Benefit ..... 107  
27.3 Life Cycle Costing ..... 108

Chapter • Twenty-Eight  
**Utility Rate Structures and Incentives, 111**

Chapter • Twenty-Nine  
**Principles and Techniques of Prioritizing Solutions, 113**

Chapter • Thirty  
**Elements and Layout of a Pump System  
Assessment Report, 117**

Chapter • Thirty-One  
**Presentation Techniques, 119**

Chapter • Thirty-Two  
**Techniques for Assisting Clients/Customers in  
Aligning Goals and Strategies with  
Assessment Recommendations, 121**

Chapter • Thirty-Three  
**Implementation Strategies, 123**

33.1 Tasks Throughout the Entire Assessment Process. . . . .	123
33.2 Tasks During an Assessment. . . . .	124
33.3 Tasks After an Assessment . . . . .	125

Chapter • Thirty-Four  
**Commissioning, 127**

34.1 Obtain Management Participation in a Closeout Meeting. . . . .	127
34.2 Implementation . . . . .	127

Appendix A  
**Glossary, 129**

Appendix B  
**References, 141**

Appendix C  
**External Links, 143**

Appendix D  
**Index, 145**

**List of Figures**

1.1 Pump types matrix: rotodynamic and positive displacement . . . . .	4
6.1 Sleeve bearings . . . . .	40
7.1 Undesirable effect of an elbow mounted directly on suction flang . . . . .	46
8.1 Flow as a function of time – operating curve. . . . .	49
8.2 Duration curve of the fl w. . . . .	49
10.1 Continuous level control P&ID . . . . .	60

11.1	Isometric diagram . . . . .	62
13.1	Title block. . . . .	66
13.2	Revision block . . . . .	68
13.3	Methods of denoting changes . . . . .	68
17.1	Datum elevation for various pump designs at the eye of first-stage impeller . . . . .	78
17.2	Example of speed variation affecting rotodynamic pump performance . . . . .	79
17.3	Example of impeller diameter reduction affecting rotodynamic pump performance . . . . .	80
20.1	Pump selection chart . . . . .	88
20.2	Pump manufacturer's published curve . . . . .	89
20.3	Certified performance curve . . . . .	90
20.4	Motor performance characteristics . . . . .	91
21.1	Operating duty point at $H_{pump} = H_{syst}$ for a rotodynamic pump . . . . .	94
21.2	Operating duty point at $H_{pump} = H_{syst}$ for a positive displacement pump . . . . .	95
27.1	Causes of production losses in refineries. . . . .	108
29.1	Best potential MTBR improvement paybacks. . . . .	114

### List of Tables

6.1	Estimated or mean time between repair, in years. . . . .	18
-----	--	----
