

The Hydraulic Institute Hires Account Manager, Energy Programs

Leading Pump Industry Organization Staffs Up for Growth in New Program Area

Hydraulic Institute (HI) Parsippany, NJ, January 17, 2019 – Molly Thompson joins the Hydraulic Institute as Account Manager, Energy Programs. In this role Thompson will lead HI's educational foundation, Pump Systems Matter (PSM), HI's Energy Rating Label Program and its Pumps Systems Assessment Professional (PSAP) Certification program. All three programs are essential tools designed to improve the energy efficiency of pumping systems. Thompson is an energy efficiency professional with a passion for raising the standard efficiency of products in the market to the highest level. During her eight years with ENGIE/Ecova, Molly managed various rebate and incentive programs while conducting training on efficiency programs and strategies.

Molly came to the energy efficiency industry in 2010 after a decade in construction, where she began by building straw bale houses and finished with traditional commercial buildings. She took pride in convincing her commercial clients to use higher performing products through payback examples.

Molly received her Liberal Studies degree with an emphasis in business and focus in math from Northern Arizona University in Flagstaff where she fell in love with the outdoors. When she's not talking efficiency, you'll probably find her biking or backpacking in the beautiful mountains of the west. After moving to Portland, Oregon in 2014, she took up road riding to get herself through the long, wet winters. In her spare time, she volunteers at her niece and nephew's schools where she recently taught a class of three-year olds how to measure, use a speed square and saw for an art project.

About The Hydraulic Institute

The Hydraulic Institute™ (HI) serves member companies and pump users by providing standards, guidelines, training and certification while serving as a forum for the exchange of industry information. HI is the voice of the North American pump industry and has become the world's resource for pumping solutions by: addressing pump systems, developing standards, expanding knowledge and resources, educating the marketplace and advocating for the industry.

Molly Thompson can be contacted at: 973.349.5329 or mthompson@pumps.org
