Foreword	v
5 Sealless rotodynamic pumps	1
5.1 Types and nomenclature	1
5.1.0 Disclaimer	1
5.1.1 Scope	1
5.1.2 Canned motor pump (CMP)	1
5.1.3 Magnetic drive pump (MDP)	2
5.1.4 Sealless pump part names	3
5.2 Definitions	14
5.2.1 Sealless pumps — general	14
5.2.2 Canned motor pump (CMP)	16
5.2.3 Magnetic drive pump (MDP)	16
5.2.4 Containment	18
5.2.5 Monitoring equipment	19
5.3 Design and application	19
5.3.1 Scope	19
5.3.2 Basic design	20
5.3.3 Guidelines for applications	33
5.4 Installation, operation, and maintenance	39
5.4.1 Unit location and foundation	39
5.4.2 Installation	40
5.4.3 Starting	41
5.4.4 Vibration	42
5.4.5 Maintenance	42
5.4.6 Troubleshooting	43
5.5 Reference and source material	46
5.5.1 Bearings	46
5.5.2 Sealless pumps	46
5.5.3 ANSI/ASME — American Society of Mechanical Engineers	46
5.5.4 AMT — The Association For Manufacturing Technology	47
5.5.5 ANSI/HI — Hydraulic Institute	47
5.5.6 ANSI/IEEE — Institute of Electrical and Electronic Engineers	47
5.5.7 ASTM — American Society for Testing and Materials	48
5.5.8 ISO — International Organization for Standards	48
5.5.9 UN Economic Commission for Europe Information Service	48

5.6	Test	48
5.6.1	Scope	48
5.6.2	Types of tests	48
5.6.3	Hermetic integrity test (standard test)	49
5.6.4	Motor winding integrity test (standard test)	50
5.6.5	Secondary containment test	50
5.6.6	Motor winding temperature rise test	51
5.6.7	Report of test	53
Appendix A	Additional rotodynamic sealless designs	54
A.1	CMP - reverse circulation end suction (circulation plan 113)	54
A.2	CMP - separated pump and motor end suction (circulation plan 123)	54
A.3	CMP - retrofit end suction	54
A.4	CMP - multistage end suction	54
A.5	CMP - self-priming end suction	54
A.6	MDP - multistage end suction	54
A.7	MDP - cover-mounted magnetic drive housing submersible	54
A.8	MDP - self-priming end suction	55
Appendix B	Index	61
Figures		
5.1.1.2	— Types of sealless rotodynamic pumps	2
5.1.2.1	— Canned motor pump: end suction, overhung impeller	4
5.1.2.2	— Canned motor pump: vertical in-line	5
5.1.2.3	— Canned motor pump: vertical submerged	6
5.1.3.1	— Magnetic drive pump: flexibly coupled, rotating shaft	7
5.1.3.2	— Magnetic drive pump: close couple, cantilevered stationary shaft	8
5.1.3.3	— Magnetic drive pump: vertical submerged, submersed magnetic coupling housing	9
5.1.3.4	— Magnetic drive pump: close couple, in-line, fully supported stationary shaft	10
5.3.2.12.1	— Typical circulation piping plans for canned motor and magnetic drive pumps	26
A.1	— Canned motor pump: reverse circulation (plan 113)	55
A.2	— Canned motor pump: motor and pump separated by thermal barrier (plan 123)	55
A.3	— Canned motor pump: retrofit with external circulation	56
A.4	— Canned motor pump: multistage	57
A.5	— Canned motor pump: self-priming	57
A.6	— Magnetic drive pump: multistage	58
A.7	— Magnetic drive pump: vertical submerged, cover-mounted magnetic coupling housing	59
A.8	— Magnetic drive pump: self-priming	60
