Foreword .....	v
10.6 Air-operated pump tests .....	1
10.6.1 Introduction .....	1
10.6.2 Types of tests .....	1
10.6.3 Definitions .....	1
10.6.4 Pressures .....	4
10.6.5 Air consumption .....	8
10.6.6 Mechanical test .....	8
10.6.7 Performance tests (when specified) .....	8
10.6.8 Plotting pump performance .....	10
10.6.9 Net positive suction head required (NPIPR/NPSHR) test (when specified) .....	10
10.6.10 Suction lift (priming) (when specified) .....	11
10.6.11 Hydrostatic test of pumps or pressure-retaining components (when specified) .....	13
10.6.12 Noise (when specified) .....	14
10.6.13 Instrumentation .....	14
10.6.14 Rate of flow (capacity) measurement .....	18
Appendix A Index .....	19
Figures	
10.6.3.7 — Effective diaphragm area .....	4
10.6.7.1 — Typical open or closed tank .....	9
10.6.8 — Plotting test results .....	10
10.6.9.2.1 — Level control NPIPR/NPSHA test with deep sump supply .....	10
10.6.9.2.2 — Vacuum and/or heat control NPIPR/NPSHA test with closed loop .....	11
10.6.10.3 — Dry or wet suction lift test results .....	12
10.6.13.2.1 — Requirements for static pressure tapings .....	16
10.6.13.2.2 — Gauge connections .....	17
Tables	
10.6.1.3.1 — Symbols .....	2
10.6.1.3.2 — Subscripts .....	3
10.6.13 — Recommended instrument calibration interval .....	15
10.6.13.1 — Actual measurement .....	15
