

Table of Contents

Forewordxiii

Chapter • One **Introduction, 1**

1.1 Purpose1
1.2 Scope.....1
1.3 Disclaimer2

Chapter • Two **Overview, 3**

2.1 Objective of a Water Treatment Plant3
2.2 What is Treated Water?3
2.3 Why Treat Water?4
2.4 Water Treatment.....5
2.5 Process Treatment Scheme.....5

Chapter • Three **Pump Selection Considerations and Guide Instructions, 7**

3.1 Hydraulic Institute (HI) Standards and References10
 3.1.1 HI Standards.....10
 3.1.2 ANSI/HI Pump References11
3.2 Site Conditions.....11
 3.2.1 Installation Space11
 3.2.2 Piping Alignments.....11
 3.2.3 Pump Intake Configuration15
 3.2.4 Indoor/Outdoor Installations15
 3.2.5 Power15

3.3 Pump Operational Requirements	15
3.3.1 Rate of Flow Requirements	16
3.3.2 Suction and Discharge Requirements	16
3.3.3 Efficiency	16
3.3.4 Type of Material Pumped	17
3.3.4.1 Solids	17
3.3.4.2 Corrosive Materials	17
3.3.4.3 Sludge	18
3.3.4.4 Scum	18
3.3.4.5 Flocculated Materials	18
3.3.5 Additional Requirements	19
3.3.5.1 Site Elevation	19
3.3.5.2 Temperature	19
3.3.5.3 Pump Flow Rate and Total Head	19
3.3.5.4 Net Positive Suction Head (NPSH)	19
3.3.5.5 Rotational Speed	19
3.3.5.5.1 Rotational Speed Limitation	20
3.3.5.6 Material Selections	23
3.3.5.7 Standards and Codes	23
3.3.5.8 Operation Time	24
3.3.5.9 Cycle Start Frequency	24
3.3.5.10 Vibration Considerations	24
3.3.5.11 Resonant Vibrations in Vertical Pumps	25
3.3.5.11.1 Industry Design Practice	25
3.3.5.11.2 Mounting Foundations	26
3.3.5.12 Testing	27
3.3.5.13 Commissioning	27
3.4 Asset Management, Life Cycle Cost, and Effective Procurement	28
3.4.1 Asset Management	28
3.4.2 Life Cycle Costs	29
3.4.3 Procurement	29
3.5 Reliability, Preventive Maintenance, and Repair	30

Chapter • Four
Treatment Plant Operations, 33

4.1 Intakes	33
4.1.1 Gravity Intakes	34
4.1.2 Groundwater Intakes.	34
4.1.3 River Intakes	34
4.1.4 Lake Intakes	35
4.2 Raw Water Transfer Pump Station	37
4.2.1 Transfer Pumps.	37
4.3 Rapid Mix.	38
4.3.1 Rapid Mix Pumps	38
4.4 Flocculation/Sedimentation	39
4.4.1 Flocculation	39
4.4.2 Sedimentation.	40
4.4.3 Conveyance and Hydraulic Considerations.	43
4.5 Filters.	44
4.5.1 Filter Backwash.	45
4.5.2 Filters Surface Wash	46
4.5.3 Filter-to-Waste	48
4.5.4 Filter Backwash Wastewater	49
4.6 Disinfection	50
4.6.1 Chlorination	50
4.6.2 Ultraviolet Light	51
4.6.2.1 Ozone	51
4.7 Clearwell Water Storage	52
4.7.1 Treated Water/Potable Water.	52
4.7.2 Plant Potable Use	54
4.7.3 High Service	55
4.8 Sludge Handling and Disposal.	56
4.8.1 Sludge	56
4.8.2 Scum	58
4.8.3 Waste Clarifier.	59
4.8.4 Sludge Transfer.	61

4.9 Dewatering	62
4.9.1 Sludge Transfer Pumps	62
4.10 Chemical Feed Systems	69
4.11 Other Pumping Applications	72
4.11.1 Sump	72
4.11.2 Sample Pumps	74

Chapter • Five

Pump Drivers, 75

5.1 Motor Types	75
5.1.1 Open Drip-Proof (ODP)	76
5.1.2 Totally Enclosed Fan Cooled (TEFC)	76
5.1.3 Totally Enclosed Nonventilated (TENV)	76
5.1.4 Weather Protected Types I and II (WPI, WPII)	77
5.1.5 Explosionproof Motors (XP)	77
5.1.6 Immersible Motors	77
5.1.7 Submersible Motors	78
5.2 Motor Starting Methods	78
5.2.1 Across-the-Line or Direct-on-Line (DOL)	78
5.2.2 Reduced-Voltage Soft Starters (RVSS)	79
5.2.2.1 Primary Resistor Starting	79
5.2.2.2 Autotransformer Starting	79
5.2.2.3 Part-Winding Starting	79
5.2.2.4 Wye-Delta Starting	79
5.2.2.5 Solid-State Starters	80
5.2.3 Variable Frequency Drives (VFDs)	80
5.2.4 Application Considerations (Solid-State Starting Methods)	81
5.3 Pump Motor Controls	82
5.3.1 Timers	82
5.3.2 Level Controls	82
5.3.3 Flow Controls	83
5.3.4 Pressure Controls	83
5.3.5 Process Controls	83

Appendix A
Pump Selection Summary Table, 85

Appendix B
Pump Materials of Construction, 91

Appendix C
**Mechanical Seals and Packing Used with Water Treatment
Plant Pumps Summary Table, 97**
